Professional Summary

Automation focused Data Analyst with 3+ years of experience at Capgemini India, working on enterprise-scale automation systems, data analytics and workflow platforms. Strong interest in intelligent automation, AI-driven systems and scalable cloud infrastructure. Seeking to transition into research in intelligent systems and automation engineering.

Research Interests

- Intelligent Automation Systems
- Agentic Artificial Intelligence
- AI-driven Infrastructure & Cloud Systems
- Secure and Scalable Automation Platforms
- Cyber-Physical Systems

Education

Class	School	Year
Bachelors of Engineering (Computer Science and Engineering)	University Institute of Engineering, Chandigarh University, India	2020

Academic Project

UAV-Based Wireless Security Experimentation (*Final Year Project*)

- Designed and implemented a custom quadcopter UAV platform, integrating flight controller, motors, ESCs and avionics components
- Developed an ESP8266-based wireless experimentation module to study IEEE 802.11 management frame behaviour in controlled academic environments
- Implemented embedded firmware and a web based control interface to conduct controlled de authentication and beacon frame experiments for analysing network resilience
- Applied concepts of wireless communication, embedded systems, computer networks and cyber security to evaluate protocol level vulnerabilities from a defensive research perspective

Professional Experience

Senior Analyst – Data & Automation Programs | Capgemini India | January 2025 – Present

Capgemini India is a global technology and consulting organization delivering digital transformation, automation and enterprise IT solutions across industries.

- Designed and developed a centralized automation management platform using Microsoft PowerApps named Benefits Realisation Tracker, enabling discovery, governance and lifecycle tracking of enterprise automation solutions across global teams
- Built scalable workflow automation systems integrating Power Automate, Power BI, ServiceNow and multiple data sources to streamline approval pipelines and operational processes
- Developed analytical dashboards to monitor automation impact and deployment health
- Integrated Python scripts into automation workflows for enhanced processing
- Collaborated with international stakeholders across USA, France, India and Poland
- Contributed to infrastructure and deployment automation using Ansible and Ansible Automation Platform (AAP), supporting configuration management and operational efficiency

Analyst – Data & Automation Programs | Capgemini India | May 2023 – December 2024

- Supported analytics and tracking for 118+ automation solutions
- Developed data driven dashboards and reporting systems using Power BI and ServiceNow to measure automation benefits and operational performance
- Built low-code applications like Account Repository to improve automation visibility, governance and lifecycle management
- Automated repetitive operational and reporting tasks using Power Automate, reducing manual effort and improving process efficiency
- Performed advanced data analysis and reporting using Microsoft Excel, including data transformation, validation and tracking mechanisms

Trainee – Cloud Infrastructure Services | Capgemini India | August 2022 – April 2023

- Gained hands-on experience in networking, Linux systems and Windows Server environments
- Worked with system configuration, access control, backup and network security concepts
- Applied foundational cloud and infrastructure management techniques

Freelance Subject Matter Expert – Computer Science | Chegg India | March 2020 – Nov 2021

Chegg India is an online education platform where I worked as a freelance subject matter expert supporting computer science coursework.

- Solved problem statements related to web development fundamentals, SQL-based database queries and algorithmic/logical reasoning while maintaining high standards of accuracy, clarity and adherence to academic quality guidelines in a remote environment

Automation & Application Development Experience

- Developed enterprise grade low code applications using Microsoft PowerApps with role based access and structured data models
- Designed and implemented Power Automate workflows integrating multiple data sources, approvals and notifications
- Built analytical data models and dashboards in Power BI using DAX measures, filters and interactive visuals
- Developed ServiceNow dashboards and reports to support automation lifecycle management
- Applied Python scripting for data processing, validation and automation support
- Supported infrastructure and deployment automation activities using Ansible

Technical Skills

Automation & Platforms: PowerApps, Power Automate, ServiceNow, SharePoint

Data & Analytics: Power BI, Excel, Data Analysis, Data Visualization

Programming: Python, SQL

Cloud, Security & DevOps: Microsoft Azure, Ansible, Ansible Automation Platform (AAP)

AI & Developer Tools: ChatGPT, GitHub Copilot (automation logic design, code assistance, workflow optimization)

Certifications

- Microsoft Certified: Power Platform Functional Consultant (PL-200)
- Microsoft Certified: Azure Security Engineer (AZ-500)
- Microsoft Certified: Azure AI Fundamentals
- Microsoft Certified: Security, Compliance & Identity Fundamentals (SC-900)
- Microsoft Certified: Power Platform Fundamentals (PL-900)
- Red Hat Certified Engineer (RHCE) EX294 – In Progress
